Worth Thinking About:

We hold these truths to be self-evident—that men are created equal; that they are endowed by their Creator with certain inalienable rights; that among these are life, liberty, and the pursuit of happiness. That, to secure these rights, governments are instituted among men, deriving their just powers from the consent of the governed; that whenever any form of government becomes destructive of these ends, it is the right of the people to alter or to abolish it . . .

Williams Institute Announces Program Will Open Aug. 27

How college students and faculty members of different faiths can help to make higher education a more powerful and effective aid to democracy, by co-operating to overcome intergroup prejudices and misunderstandings on the campus and by working together for solution of common problems, will be discussed at daily round table sessions at the 1939 Williamstown Institute of Human Relations.

The institute will be held from Aug. 27 to Sept. 1 on the Williams college campus.

Prominent educators and students from colleges and universities in all parts of the country, as well as student pastors, Newman Club priests, Hillel Foundation rabbis, YMCA and YWCA secretaries, and other directors of campus religious activities, will take part in the round table series devoted to campus organizations.

The aim of these discussions, as of all conferences conducted at the institute, will be to try to develop a common understanding of the subjects studied, rather than to seek individual or group commitments to specific policies or proposals.

The campus organizations section will be one of several specialized groups which will consider particular aspects of the institute's general theme, "Citizenship and religion: a consideration of American policy with regard to the relations of church and synagogue to the state."

Although college problems have been examined to some extent at previous meetings of the Institute of Human Relations, this is the first time such a comprehensive study of collegiate life has been planned, and it is expected that the deliberations will have a definite value in promoting tolerance and pointing the way toward increased co-operation among various religious and cultural groups on the campus.

Herbert L. Seamans, college secretary of the National Conference of Christians and Jews will be in charge of the institute.

"THAT'S WHY HE'S AN AMERICAN"

An American never starts a thing That he doesn't finish right And he's never content till the job is done With never an oversight; When he says "I will" he sets his jaw, And crushes his way clear thru, And that's why he's an American He's learned to dare and do. He has learned that a task that's worth the while Is worthy to be well done, And he isn't the sort to mutiny When the victory's all but won. He isn't the sort to hem and haw, And to pass the buck along And that's why he's an American He's there at the final gong. He is there with a crashing, smashing punch, He is there with a heart that's light, And whatever he tackles, rest assured, Will end in a finished fight; And there's nothing on earth will change his mind, When he's in a fighting mood, And that's why he's an American He comes of a fighting brood. And whether the fight is his alone Or the fight of a nation's host, If the cause is just he'll give his all, And there'll be no idle boast; He'll do and he'll give till the need shall cease, Till the right transcends the wrong, And that's why he's an American And he's a hundred-million strong! William Dayton Wegfarth

"Why Church Survives"

"Three reasons why the Christian church survives" was the challenging topic presented last Sunday by Dr. Justin W. Nixon, professor of Christian Sociology at the Colgate-Rochester Theological seminary, as he addressed the auditorium conference service. Dr. R. B. Jack of Northfield presided.

"The Christian church survives, depressions, prosperity, dictatorship, and all else," said Dr. Nixon, "is, first, that it furnishes the cement that holds society together. The moral standards as stated in the Ten Commandments, for instance, are taught and maintained by the church."

"It is also the seedbed out of which reform and progressive movements grow. Schools, colleges, hospitals, reform movements, politics, and economics, more often than not rise out of the church. It is the clover crop of civilization in that the church fixes certain elements in the soil of society so that other institutions can draw upon them and grow."

"The last reason for the survival of the church is that it points men to the final redemption in God. The church testifies to the inner hunger of man for something greater than himself, for God, and that hunger the church satisfies through Christ. No other organization in society spends its full time in this service of redeeming the souls of men and women. The strong implication, then, is this: the stronger the church the better the society."

BANKING LOOKS AHEAD

Teamwork Wins

The traditional American formula for success is teamwork... cooperation... mutual helpfulness. Few men reach the top purely through their own efforts. Rather, they succeed because they cooperate with — and have the cooperation of — others.

Likewise no nation can achieve and maintain a standard of living such as we have in America without teamwork among all classes and groups. If we are to go forward to greater prosperity in the future, we must do it hand in hand as a united people.

This bank will continue to cooperate for the best interests of the community and nation.

It was Vermont day at the New York Worlds Fair. Our friend, Governor Aiken was there. He was given all the attention due to his rank as the Governor of a great state. There was a special program in the dedication of his states exhibit but when he delivered his address, Governor had something to say, which was heralded through the press about the country. As a true Vermonter, he started off in a mild way about the glories of his state, but waxed warm toward the end. We echo his words, "Vermont has steadfastly refused to delegate the authority and responsibility for our personal and local affairs to an all powerful central government." "We don't believe in building a world's fair on a foundation of dependency or subservience." There's much to think about in his message. Wonder if Washington tuned in?

Centuries ago there was a Man, who from a mountain side, taught multitudes. He said that if a man asks you to go a mile with him, to go him twice. If a man steal your coat, give him another also. He said the meek shall inherit the earth. Since then however, the proud and the haughty, the warriors and the politicians have ignored this line of thought, and endeavoring that they knew better. Well they have made an awful mess of it and put much of this world in terrible shape. A long time ago also, there was a sermon on the mount and something was said about giving alms in secret. The way alms giving has been paraded and strutted about from Washington, the past few years, makes me sick.

Quite a number of our residents have engaged the editor in conversation over the article in last weeks Press on the amount of property for sale. It has been suggested that if signs "for sale" were placed upon every property, the owner of which was desirous of selling, it would afford a sorry spectacle as one traveled upon our highways. It might appear as if the town was "selling out." Well brother, be that as it may, we are no differently situated

here than people are elsewhere. Perhaps, we have been fed up on "Northfield, the beautiful" and realizations have not materialized. There is no doubt but that in general, real estate has depreciated, perhaps as a result of increasing taxes, but the man who sells, can not better his position. I say again, as I said then, that now is the time to buy a home, real estate at a most attractive figure. Don't sell Northfield "short"—it still has promise for the future.

The waiter said: That madam, is a Vitamin Bee.
Oh, Mummy look at that funny man across the street.
